See page 3 for more information.

Product specifications are subject to change without notification. Consult the installation instructions before you begin installing this range hood. *Check local make up air codes for guidelines.

LINER SPECIFICATIONS

Liners are stainless steel kits that are optional for cabinet insert hoods. They create a metal perimeter to “line” the wood below the range hood with metal. They create a more finished look and move the range hood up creating additional capture area. In some cases, a liner may be required by local code if the cabinet starts at below 30” off the stove (check local building codes). All liners are adjustable in depth with a telescoping frame.

LINE30ST - USE WITH INSP28 ONLY FOR 30” WIDE CABINETS

LINE36ST - USE WITH INSP28 ONLY FOR 36” WIDE CABINETS

LINSPT301228 / LINSPT361228 SELF SUPPORTING LINER USE WITH INSP28 ONLY

The liner is installed with screws against the walls of the cabinet, aligned with the cabinet bottom. The hood is installed onto the thick metal interior portion of the liner and is fully supported by the liner.
